Shutters could change the value of your property and look amazing!

Shutters are a premium window treatment and should increase the value of your property. Shutters are very easy to clean, child safe and always look good. They also last so much longer than blinds, so once you have had shutters installed you will probably never replace them.

PVC Shutters

PVC shutters are the more popular option due to their strength and water resistance. Maximum panel width is 850mm in PVC. Louvres over a certain width have aluminum added to the inner core to strengthen them too.

Timber Shutters

Timber Basswood Shutters, grown in sustainable forests. Door panels in timber can be made up to 950mm wide.

Options

Swan Blinds Shutters have three control options.

Hinged Shutters- The most common and most popular option

Bi-fold Shutters- This option does require tracks to be installed

Sliding Shutters- Sliding Shutters will intrude into the room as they need to slide on panel in front of the other. See our designers for more information.

Planation Shutters Timber & Timber-Look Shutters Swan Blinds Shutters will make any home look more beautiful.

We make our Shutters in either PVC or Timber, the choice is yours. Timber weighs less so the shutter doors can be manufactured slightly wider than PVC. But PVC is stronger and water proof. Choose either 89mm elliptical louvres or 63mm Elliptical blades depending on how you want your shutters to look.

Shaped Shutters

If you have shaped windows Shutters could be your only option to stop the heat coming in during Summer or the heat escaping through the window in winter. We can make shutters for nearly any shaped window and most can still be opened and closed.
